SONNEMAN A Way of Light / *Suspenders Precise*

Robert Sonneman originally designed the Suspenders LED luminary as a modular system that could be customized to a space and its lighting requirements. Now, Suspenders Precise expands the possibilities with new components that allow for direct and reflected ambient light in both spot and flood options. The new fixtures, which come in black and satin white, can aim up, down, or be entirely adjustable.

See it at: [ICFF](#), booth: 1463.
